Mayfair & Grace Introduce Revolutionary 'Pain-Free' Alexandrite Laser Hair Removal Treatment in the Cotswolds.

We only use the best equipment possible to treat our clients, ensuring the safest and most clinically effective treatments possible. With this in mind, we are delighted to announce that we have recently added the world's most exciting development in 'pain-free' laser hair removal technology: The Motus by DEKA. This new and unique laser hair removal device uses a specialist new technology: Moveo. This advanced technology allows us to use the exact type of laser considered by dermatologists as "most effective in laser hair removal treatments" (Alexandrite) but in a new 'pain-free' mode!

Frequently Asked Questions:

How does hair removal work? Light is emitted and absorbed within the hair, which is then converted into heat energy damaging the hair follicle.

What does it feel like? With the standard laser hair removal treatments, you can feel what is described as a "hot flick" of an elastic band during treatment. However, with the brand new pain free Motus Moveo treatment, you will feel little to no sensation at all. The built-in chill tip allows even more comfort for clients.

Who is suitable for treatment?

Most people are suitable for treatment. We recommend a consultation with your laser technician to ascertain if the treatment will be successful for you. Grey/white hair has no melanin so is not recommended for treatment.

Male Treatments

We Use The UK's No.1
Laser & IPL Brand...

We offer a safe, long term solution to unwanted, excess hair for both men and women.

Treatment is suitable for the face and body, is quick and results can be seen from just a few sessions.

How many sessions will I need?

The number of sessions required varies from client to client and depends on many factors. However, as a guideline, it is always recommended to complete at least a course of six sessions per treatment area.

How long will it take for me to see results? Clinical studies show that clients have seen outstanding results in as little as four sessions.

Please note: A patch test is required 1 week prior to treatment

Skin Rejuvenation

We Use The UK's No.1
Laser & IPL Brand...

Boost your collagen to lift, tighten the skin and rejuvenate lacklustre skin.

This treatment will also help to reduce the appearance of fine lines and smooth wrinkles pigmentation and redness.

How does skin rejuvenation work? Pulses of light are emitted to target skin discolouration (brown and red lesions) and create a more youthful even complexion. In addition, the laser stimulates the skin leading to an increased production of new collagen and elastin. This improves the skin, evening out the texture whilst reducing the appearance of lines and wrinkles. The skin will also become tighter and the appearance of scarring can be reduced.

Laser Skin Rejuvenation	COST PER TREATMENT	20% OFF COURSE OF 6 SESSIONS

Chest	£150	£720
Hands	£100	£480
Full Face & Neck	£300	£1440
Full Face, Neck & Chest	£440	£2112

What does it feel like?

The treatments can feel mildly uncomfortable, but no anesthesia is required. Most describe the treatment like quick pin prick along with a warming sensation.

How many sessions will I need?

Treatments are carried out every 2-4 weeks and we recommend a course of 6 treatments for best results.

LASER TREATMENTS

Pigmentation Removal

We Use The UKs No.1
Laser & IPL Brand...

Restore an uneven skin tone for a youthful and healthy looking skin. Suitable for age spots, liver spots, sun damage and more.

How does skin pigmentation removal work? Pulses of light are released and are readily absorbed by the high concentration of the melanin found within the pigmented lesions. The rapid absorption of light energy heats the melanin and causes the destruction of the melanin rich cells. This triggers the body's natural healing process to stimulate the growth of new healthy skin tissue.

How many sessions will I need? The number of treatments will depend on the type and size of the pigmented lesion but typically 1-3 sessions are required at 4-6 week intervals.

LASER TREATMENTS

Thread Vein Removal

We Use The UK's No.1
Laser & IPL Brand...

Laser therapy is the best way to deal with unwanted facial vessels. It reduces the number of lesions and improves the skin's condition and appearance.

How does the treatment work for facial vessels? Laser energy is applied to the skin where it is readily absorbed by the blood vessels, heating them to the point where they are destroyed. Following the treatment, the vessels quickly clear as they are reabsorbed by the body, leaving little or no trace of the original lesion.

What does it feel like?

The treatments can feel mildly uncomfortable, but no anesthesia is required and it is quite a quick procedure. Most describe this treatment like hot quick pin prick.

Acne Treatment

We Use The UKs No.1
Laser & IPL Brand...

We offer a professional acne treatment that delivers a highly effective, safe, and proven method of reducing acne.

How does the treatment work?

Pulses of light are passed over the affected area. The light and heat from the laser destroys any bacteria that is present on the skin aiding in the reduction of acne. This treatment also reduces redness, the appearance of scarring

What does it feel like? The treatments can feel mildly uncomfortable, but no anesthesia is required. Most describe this treatment like quick pin prick along with a warming sensation. How many sessions will I need? Treatments are carried out every 2-4 weeks and we recommend a course of 6 treatments for best results.

Fungal Nail

We Use The UK's No.1
Laser & IPL Brand...

With the use of cutting edge technology we offer a professional, safe, quick solution to fungal nail.

How does the treatment work?

Light is absorbed by the water in the skin underneath and around the nail, creating heat. This heat helps destroy the dermatophytes and eliminate the fungal infection. The laser applicator is placed on the nail and a short pulse of light is released.

What does it feel like? A warm sensation and some discomforts are felt during treatment.

How many sessions will I need?

The number of treatments required varies, although typically 2-6 treatments are needed for optimum results.

Test Patch - what to look for?

Test patches are carried out to determine the treatment parameters and to judge how your skin might react to a full treatment. A test patch is a small area with a similar hair and skin to the treatment site and allows us to assess how well the light energy is being absorbed and whether your skin is responding as we would expect.

Pre-Treatment Advice

- The area treated must be free from make-up, perfume, deodorant, body and face creams. Avoid waxing, plucking, hair removal creams and bleaching one month prior to hair removal treatment.
- Hair should be shaved 24 hours prior to treatment and no longer than 1mm in length.
- The area to be treated must not have an active or fake tan. The use of sun beds or prolonged sun exposure is not allowed one month prior to treatment

Post Treatment Advice

In order to minimise skin heating and to reduce the possibility of any skin reactions, the treatment area may be cooled before, during and after the procedure. If the area still feels hot at home, you can apply a cold flannel or cool pack. Do not allow ice or ice packs into direct contact with your skin. Following treatment, the area may appear red and raised and you may experience a tingling sensation. This is completely normal and should settle over the next few days.

If you have any concerns after your treatment, please get in touch by calling 01666 504128
